## An innovative, elegant and safe way to COMMUNICATE

Take advantage of the new technologies, present and share with your customers anything you want or wish to.

GESAB atrium for tablets meets the current requirements for communication, merging 3 key factors: **safety**, **functionality** and **aesthetics**.

**quality**

**design**

**safety**

**connectivity**

**rotation**

**applications**

**quality**

GESAB atrium is made of Duraluminium, the new definition of lightness. A light and durable material for a unique and contemporary design. The hardness of this material is five times higher than standard aluminum and doubles the tensile strength, allowing Premium finishes.

## design

Smooth and beautiful lines that cause a high eye-attraction.  
Minimalist design that combines simplicity and sophistication.  
A unique and ergonomic design for all percentiles with a warm  
and pleasant touch.

## safety

iGesab's atrium has several security systems:

Tablet encapsulation through a mechanical system (special hardware option)

Security access for control buttons and acoustic baffle.

Pendulum balance system with strategically placed counterweights to ensure the equipment stability in case of strikes or displacements.

## connectivity

iGesab podium allows connectivity in both static and mobile situations, thanks to the included plug and play system.

iGesab  
for iPad

## rotation

iGesab allows the selection of the using position, being able to work both horizontally and vertically or choosing a fixed assembly. All of this is possible due to the rotation system based on a pivot. Freedom of movements without limits.
