## Pop-Art Glo Screens

Do you currently display your digital media on standard 'grey box' LCD and Plasma screens and wonder why people pass right by without even looking? The answer is simple, your screens have lost their WOW factor. Consumers have learnt to ignore standard LCD and Plasma's now they're common place in homes and retail venues globally!

At SLR we make screens which can't be ignored and the concept is simple, if our screens capture your customers attention then they'll spend more time looking at your content. Our pop-art dayglo bubble range is proving to be a great success, offering a stylish, fun method of displaying any digital content. Available in wall or ceiling mounted options either product can feature touch screen functionality with built-in PC or standalone digital media player. Available in a wide range of colours such as red, green, yellow, blue, orange or clear the Bubbles are internally illuminated to add dramatic effect so there is sure to be a Bubble to fit your design.
